

8 billion strong - infinite possibilities for people and planet

N-IUSSP | November 28, 2022

Our world is approaching a landmark moment in human history. On 15 November 2022, the global population is projected to reach 8 billion people. Thanks to science, technology, and groundbreaking innovations, we now live longer and healthier. It took the human family 125 years to get from 1 billion to 2 billion. But only 12 years to grow from 7 to 8 billion.
